CERTIFICATES

- Java Programming- CodSoft
- Python for Data science- IBM.

- Software Engineering job simulation- J.P. Morgan chase & co.
- Artificial intelligence - Edunet -AICTE

- Introduction to Artiflcial Intelligence - Infosys
- Group Discussion – TCS ION

PROJECTS

1) Participated in Hackathon Conducted by Central Govt by SIH with Collaboration of Value Laden:

ATS-Friendly Resume Reviewer is a tool that analyzes resumes to ensure they are optimized for Applicant Tracking Systems (ATS). It checks for proper formatting, keyword usage, and content structure to increase the chances of passing through automated screening, helping job seekers get noticed by recruiters.

1) Doing Project on Student Study Material Website:

Created a study material download website for college, enabling students to easily access and download course-related resources, lecture notes, and reference materials, organized by subjects and courses.

3) Participated in Hackathon Conducted by Govt by SIH with Collaboration of Audisankara College:

Developed a garbage collection software application to optimize waste management processes. The system tracks collection schedules, monitors waste bins, and provides route optimization for garbage collection vehicles, improving efficiency and reducing operational costs for municipalities and waste management companies.

4) Attendance Management System using Face Recognition

Developed an AI-powered attendance system using facial recognition to enhance accuracy and security. Implemented Python, OpenCV, and machine learning techniques for real-time identification. Reduced manual errors and prevented proxy attendance, improving efficiency.

Drawing	**Games**	**Photography**
Travel	**Music**	

DECLARATION

Knowledge is the sea, I'm not a diver rather a helmsman steering my way through that sea, seeing the beneath, above and beyond. I bring the best of myself with utmost earnestness. This isn't an exception.
